UV-Stable Acetyl

MATERIAL

Australian Made

ORIGIN

SPECIFICATIONS

Product Type	Sign cover-up clip
Pack Size	20 clips
Clip Size	95mm x 61mm x 22mm
Weight	Approx. 100g per clip
Material	UV-stable high-density acetyl with strong shape memory
Panel Channel	Standard corflute sign panels
Sign Channel	Flat aluminium sign blades, 1.6 to 2mm (not suited to boxed-edge signs)
Clips Per Sign	Two suit a 600x600mm panel; larger panels may need two or more
Installation	Fitted and removed from ground level with a Stop/Slow bat
Application	Temporary cover-up of existing aluminium speed signs during traffic control works
Warranty	UAGS Traffic Control Equipment Warranty, 1-year limited coverage

TYPICAL USE

Covering permanent regulatory speed signs so road users are not shown two speed limits at once, during roadworks, lane closures, changed traffic conditions and temporary speed zone setups, including aftercare. The plain white back of a multi-message panel makes a blank cover, or a worker symbolic panel can face traffic.

DEPLOYMENT

Used by trained traffic control personnel in accordance with the applicable TMP, TGS, SWMS and site procedures. Ground-level fitting applies where site conditions and approved procedures allow.

ORDERING

Available from UAGS (SKU TCEASYCLIP); current pricing at uags.com.au. Trade accounts and bulk pricing available on request: (03) 8750 0926 or sales@uags.com.au.
