TYPICAL USE

Road resurfacing, newly sealed bitumen, wet or damp surface conditions, slippery temporary surfaces, loose material on road surface, oil residue, icy conditions, moss-prone areas, construction works, road deviations, pavement repairs, bridge approaches, changed traffic conditions and other temporary traffic management layouts where a slippery road surface warning is specified.

DEPLOYMENT

Road surface hazard warning symbol panel used to warn road users of a slippery or temporarily hazardous road surface condition where this warning is specified as part of a broader temporary traffic management arrangement. Selection, placement, panel pairing, visibility, frame arrangement, repetition and use remain subject to the applicable TMP, TGS, road surface hazard arrangement, traffic control arrangement, site arrangement, project requirements, site conditions and relevant authority requirements.
